# Chapter 1

## Media Tests

### Question

How to embed video stream from CT Digital Archives into Bookdown, WITH-OUT autoplay, regardless of whether the user's browser is set to block autoplay?

**BEFORE TESTING:** TEST in both Firefox and Chrome for auto-play issue. Make sure that your browser settings do NOT block autoplay content by default, since we cannot ensure that users will have same browser settings as developers.

Figure 1.1: Here's a sample YouTube caption, with option to add Markdown links and footnote to full video at CTDA.

**1.0.0.0.1 Best solution so far (with no autoplay): YouTube video (selected clip) iframe in web edition, static image in PDF edition, caption and footnote to full video at CTDA** Upload full video to CTDA for historical preservation, and insert only a short video clip of relevant portion to YouTube (looks cleaner) or Vimeo, then insert the latter in Bookdown with iframe. Since YouTube/Vimeo clips do NOT autoplay, this will work with R code-chunk method above.

### Issue Background

Here is an oral history video as displayed on the CTDA site, which does NOT autoplay:

<https://collections.ctdigitalarchive.org/islandora/object/120002:172>

Here is the CTDA MP4 video stream for that object, which runs AUTOPLAY in Chrome and FFox for Mac (and perhaps other browsers). CTDA says there is no setting to turn off autoplay from datastreams

<https://collections.ctdigitalarchive.org/islandora/object/120002:172/datastream/MP4>

The stream above also works with this “view” ending:

<https://collections.ctdigitalarchive.org/islandora/object/120002:172/datastream/MP4/view>

### Trying iframe solution

Here is Bookdown code-chunk that displays CTDA video in web edition, static image in PDF edition, BUT CANNOT TURN OFF AUTOPLAY using the iframe method, even if I add “?autoplay=0” or “?autoplay=false” to the end of the src string, as suggested in Stackoverflow further below.

Question: is there a way to add a “no autoplay” command to the iframe through jQuery in the custom-script.html?

### Trying HTML5 video tag solution

Here’s a solution using the HTML5 video tag, which simply says NOT to insert “autoplay”.

The HMTL5 video tag solution stops autoplay, but it is NOT ideal for Bookdown-generated books because:

- Bookdown/knitr does not *appear* to support the HMTL 5 video tag in the same way as it supports knitr::include\_url. I could submit a request

Figure 1.2: Here's a sample CTDA video caption, with option to add Markdown link and footnote.

to Bookdown to support HTML5 video tag, but it's not likely to happen soon....

- This means that I cannot use Bookdown built-in support for figures using the HMTL5 video tag, such as:
  - the if-else statement in the R code-chunk that places the interactive iframe in HTML and the static floating image in the PDF, but the same caption for both
  - figure auto-numbering, such as Figure 1.2, 1.3, etc.

**Trying iframe solution with short video clip, stored locally, with custom script - but it autoplays**

**Example of Vimeo video clip in web edition (no autoplay), with static image in PDF edition,**

#### More resources
